

Geotechnical Seminar

Advanced Software for Foundation Design

Nisha Mehta

CEO

Dimensional Solutions, Inc.

Houston, Texas

Bio. Nisha Mehta grew up in Mumbai, India and completed her Civil Engineering Bachelor's Degree at Indian Institute of Technology (IIT). She then came to the United States and completed her master's degree in Civil Engineering at the University of Houston.

In the 10 years following graduation Nisha was employed by other companies and worked on various types of civil/structural engineering projects in the fields of infrastructure and public works, cogeneration plants, petrochemical and refinery units.

During her years of working on these projects, she came to realize that foundation design would take fewer man hours and be more cost-effective if the process was stream-lined and made more efficient. Having a strong engineering background plus the real world design experience allowed Nisha to bring forth these software solution ideas to Dimensional Solutions in 1996.

Nisha currently acts as liaison between the software development team and the products' end users. She helps determine the enhancements and additions to be made to the current software suite of products..

When and Where.

Thursday, March 8, 2:30 PM

CE Building, Room 203

Event Series Website.
